This small utility will allow one to change all the units on UIcontrols in a fig file. It will ask for the fig file name, change the field 'Units' in each UIcontrol in the fig file and overwrite the same fig file.

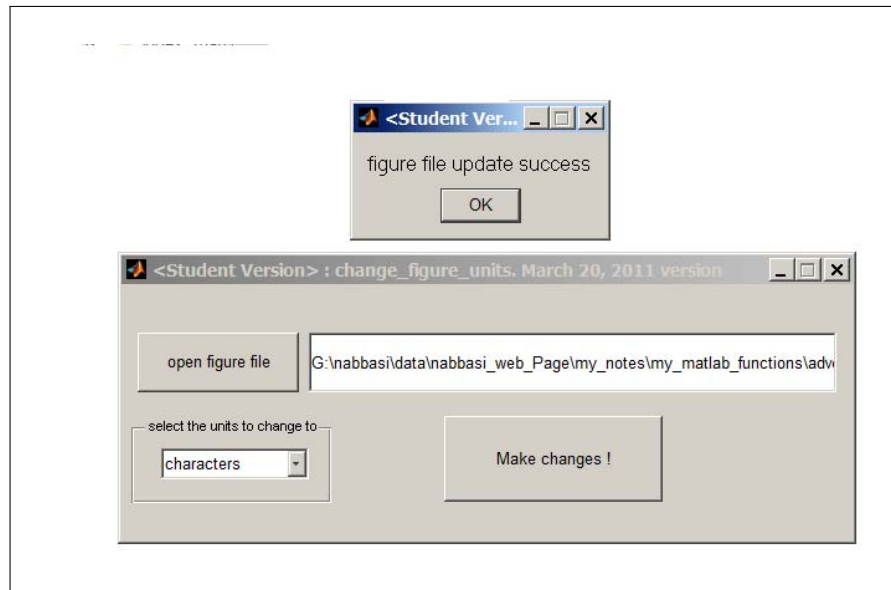

Figure 1: screen shot

To use this, download the following zip file to the some folder on your computer, and unzip it to extract the 2 files in it.

Then from Matlab console, type `change_figure_units`

`change_figure_units_code.zip`

Code listing

1. `change_figure_units.m`
2. `nma_set_figure_position.m`
3. `change_figure_units.fig`
