INTRODUCTION

This card is a concise comprehensive reference for the C programming language. It is designed to be used in a computer environment. It allows you to quickly look up information about the language and its features. The card is divided into three sections: data types, operators, and functions. Each section contains a list of keywords and their definitions. The keywords are organized in alphabetical order, making it easy to find the information you need. The operators section includes a list of common operators used in the C language, along with their syntax and examples. The functions section includes a list of built-in functions and their syntax. The card is a valuable resource for anyone working with the C programming language.
