my mathematica package

Nasser M. Abbasi

January 10, 2017   Compiled on July 11, 2025 at 5:43am

This package contains collection of useful functions I wrote into one package so it is easy for me to reuse them. I use these for my HW's and school projects. Few of the functions are obtained from the net, and possibly modified, with the name of the original author given.

Not complete, and work in progress. May contain bugs.

Here is the current documentation of the package

1. Test notebook. This notebook contains examples using the package. `test_nma.nb`

2. The above in PDF format `test_nma.pdf`

3. The above in HTML format HTML

4. The package itself. nma.m Jan 10, 2017 version.
